

This exploded view diagram illustrates the assembly of the intake manifold. The components are numbered as follows:

- 1**: Intake manifold body
- 2**: Air filter element
- 3**: Air filter housing (lower part)
- 4**: Air filter housing (upper part)
- 5**: Air filter housing (cover)
- 6**: Bolt for air filter housing cover
- 7**: Bolt for air filter housing
- 8**: Nut for air filter housing
- 9**: Air filter housing (upper part) - (Note: This number is not explicitly labeled in the diagram but is implied by the context of the assembly)
- 10**: Gasket for intake manifold

The diagram shows the intake manifold (1) being connected to the intake manifold gasket (10), which is then connected to the air filter housing (3, 4) and the air filter element (2). The air filter housing cover (5) is shown being secured with a bolt (6). The air filter housing (3, 4) is secured with bolts (7) and a nut (8). The intake manifold is connected to the intake manifold gasket (10), which is then connected to the intake manifold (1). The intake manifold is connected to the intake manifold gasket (10), which is then connected to the intake manifold (1). The intake manifold is connected to the intake manifold gasket (10), which is then connected to the intake manifold (1).
